

Sponsorship Information Packet

"Angelbotics is committed to fostering diverse groups of Denver high school students to be STEM leaders and innovators. We achieve this by engaging them in exciting projects that build science, engineering, and technology skills, while inspiring innovation and competition as the Angelbotics Team. This will foster well-rounded life skills, including self-confidence, communication, and leadership."

- Angelbotics Mission Statement

The *FIRST* Robotics Competition

FIRST was founded in 1989 to inspire young people's interest and participation in science and technology. *FIRST* designs accessible, innovative programs that motivate students to pursue education and career opportunities in science, technology, engineering, and math, while building self-confidence, knowledge, and life skills.

WHO WE ARE

Angelbotics is the *FIRST* Robotics team from East High School in Denver, CO. At an athletic-focused school, we are a diverse and inclusive group of STEM (Science, Technology, Engineering, Mathematics) students and mentors, and the team where the “quirky kids” hang out. We have a rainbow of ethnicities on our team, and CIS is often the minority. We run the gamut from neurotypical to kids associated with every part of the autism spectrum. Seniors down to freshmen. Yet, they all shed their labels when they walk through the door and work together to design and build a competition robot. It’s beautiful to watch.

OPPORTUNITIES WE CREATE

Students spend the first semester of the school year learning how to *design a robot in CAD* before they take the raw materials and *use commercial machinery to form the parts* that will eventually become the robot. Some students study teams we are going to compete against, *using data analysis* to

create our season strategy. During this time, they also *learn how to wire* the motors that drive the robot. At the same time, students are *learning to program the robot using Java.* While all of that is happening, another group of students is creating our seasonal theme *using graphic design software*. Finally, students keep the world up to date on our team through social media posts, using their *photographs.*

During the second semester, the fun begins as students learn this season's game and apply the skills they learned during the first semester. In six weeks, they will build a massive robot capable of moving at 30mph. Most years, we travel to competitions outside of Colorado, giving the kids the opportunity to learn how to *create a travel budget*, *fundraise* for their trip, and work together to *piece together the various aspects of hotel, airline, and public transportation* that make an out-of-state field trip successful.

Skills Students Learn:

- Mechanical Engineering
- Entrepreneurship
- Community Outreach
- Teamwork
- Programming
- Grant Writing
- Machining
- Computer-Aided Design
- Fabrication
- Communication
- Electrical Engineering
- Graphic Design

WHAT WE CAN DO WITH YOUR DONATION

$150

- Allows us to buy two robot batteries. We use a different one in every match
- Builds one drivetrain module
- Buys one robot radio

$500

- Obtains a RoboRio (robot's main computer)
- Funds all of the 3D printing materials for developing one robot
- Buys 100 feet of aluminum tubing for building our robots

$3000

- Purchases our entry fee to a second regional competition
- Funds all the electrical systems for one robot
- Buys 2 3D Printers for our team
- Buys every student a team shirt and hat, allowing them to showcase their team pride

$6000

- Pays for our registration and entrance fees to compete in the *FIRST* Colorado Regional (an event we have won three of the last four years)
- Funds our entire fall training season

$10,000

- Funds the entire construction of one robot

Sponsorship Levels:

Angel $10,000 or more:

Extra-large, custom logo bumper sticker on our robot
Thank you, and a prominent link on the front page of our website
Press release with photo
Appreciation letter, certificate, and plaque
Team t-shirts
Separate banner with custom logo displayed at all team events

Archangel $2,000 to $9,999

Large, custom logo bumper sticker on our robot
Thank you, and a prominent link on the front page of our website
Appreciation letter, certificate, and plaque
Team t-shirt
Large logo on team banner

Guardian $500 – $1,999

Thank you, and a link on our website
Medium logo on our robot
Logo on team banner in competitions
Team t-shirt
Certificate and letter of appreciation

Seraph $150-$499

Thank you on our team's website
Link to sponsor's web page
Small logo on robot
Letter of appreciation

Cherub under $150

Thank you on our team's website

SPONSORSHIP FORM

Name of Organization: _____

Contact Name: _____

Address: _____

Phone: _____

Email: _____

Our organization would like to be a(n):

- ☐ Angel Sponsor ($10,000 or more)
- ☐ Archangel Sponsor ($2,000 to $9,999)
- ☐ Guardian Sponsor ($500 – $1,999)
- ☐ Seraph Sponsor ($150-$499)
- ☐ Cherub Sponsor ($149 and under)

We would also like to help by providing:

- ○ A mentor to the team
- ○ Access for facilities (machine shop/storage)
- ○ In-kind donations
- ○ Resource donations

If providing facilities or in-kind donations, please specify:

_____

_____

_____

_____

Mailing Address: PO Box #300023, Denver, CO 80203

Tax Identification Number: 86-3920113

If you have any questions, please contact us at *grants@angelbotics.org*

Thank you to Bryce Hanson for this packet's framework.
